*Aspiring women to become
an inspiration*

MISSION STATEMENT

As the lead Polytechnic Institute for Women Empowerment, we advocate and provide programs and services geared towards a quality assured, inclusive and gender-fair TVET.

VISION STATEMENT

To be the leading TESDA Polytechnic Institute for Women in 2028.

ORGANIZATIONAL GOALS

- To serve the needs of stakeholders, especially women (PEOPLE WE SERVE);
- To increase employee engagement initiatives (PEOPLE WITH US);
- To respond to the TWC registry of external demands and internal requirements (PROCESS);
- To generate sufficient resources for sustainability (PESO).

HERSTORY

The establishment of the TESDA Women's Center started in 1993 when former Senator Leticia Ramos-Shahani met with some members of the Japanese Diet. Between 1996 and 1997 the Exchange of Notes for the Project was done.

A total amount of Japanese Yen 2.620 Billion (USD 23.82M) was granted for the construction of the Center. This development was in sync with TESDA's affirmative action policy of ensuring that women are trained in industrial courses traditionally dominated by men. The policy requires that at least 10 percent of the total TESDA annual training graduates are women. The turnover / hand-over ceremony and inauguration of the TESDA Women's Center and its Dormitory was held in 1998.

It was originally named the "National Vocational Training and Development Center for Women" but later changed to what is now known as the "TESDA Women's Center".

Grant aid by the Government of Japan as a token of friendship and cooperation between the Government of Japan and the Government of the Philippines

4. Bread and Pastry Making
 - Cookies, Cupcakes, Brownies and Pandesal Making

The TWC is the first technical-vocational training institution in Asia to earn international accreditation given by the Asia - Pacific Accreditation and Certification Commission (APACC)

COMPETENCY-BASED TRAINING (CBT)

1. It is an approach to vocational education and training that places emphasis on what a person can do in the workplace as a result of completing a program of training.
2. The training is based on curriculum developed from the competency standards specified by the industry.
3. Learning is modular/self-paced in its structure and the trainee is allowed to progress at his/her own pace.
4. It describes the core, common and basic competencies required for the performance of a specified occupation.
5. Each training program consists of competencies that a person needs to achieve based on the given qualification in their chosen field of occupation.
6. These programs are nationally promulgated to ensure that the trainees receive quality, relevant and employable skills, knowledge and attitude.
7. It also recognizes both on-and-off-the-job delivery modes.
8. After successfully completing the program, the trainee is required to undergo competency assessment and acquire a National Certificate.
9. Value-adding feature of the CBT program is the integration of Work Ethics and values Development, Gender Sensitivity Training, Entrepreneurship Appreciation and Motivation Course, and Basic Computer Literacy.
